North American Gem Inc. Grants Incentive Stock Options

August 18, 2008: North American Gem Inc. (TSX-V: NAG) would like to announce that pursuant to its stock option plan, the Company has granted incentive stock options to its directors, officers, consultants, and employees to purchase 500,000 common shares in the capital stock of the company, exercisable for a period of five years, at a price of 18 cents per share. These options are subject to a four-month hold period.

About North American Gem Inc. North American Gem Inc. (TSX-V symbol: NAG) is a junior exploration Company based in Western Canada. The Company's primary goal is to explore for Uranium, Molybdenum, Gold, Copper and other base metals in Canada. The Company is actively pursuing several opportunities, including the Louise Lake copper-gold-molybdenum-silver project located in British Columbia. The Company is also pursuing its uranium projects, consisting of the Whiskey Gap, Del Bonita, Western Basin, and Bonny Fault projects, all located in Alberta. In addition the Company is also pursuing its Mosquito Gulch uranium property located in the North West Territories and the Ranger Lake Uranium property located in Ontario.

Cautionary note:

This report contains forward looking statements, particularly those regarding cash flow, capital expenditures and investment plans. Resource estimates, unless specifically noted, are considered speculative. Any and all other resource or reserve estimates are historical in nature, and should not be relied upon. By their nature, forward looking statements involve risk and uncertainties because they relate to events and depend on factors that will or may occur in the future. Actual results may vary depending upon exploration activities, industry production, commodity demand and pricing, currency exchange rates, and, but not limited to, general economic factors.

Cautionary Note to US investors: The U.S. Securities and Exchange Commission specifically prohibits the use of certain terms, such as "reserves" unless such figures are based upon actual production or formation tests and can be shown to be economically and legally producible under existing economic and operating conditions.
